

Managing the supplier in a circular economy supply chain

- **Thematic Areas:**

Supply Chain Management, Supplier Management, Sustainability, Organizations.

- **Expected synergies and complementarities:**

Enrich and broad the state of the art, developing in particular the intangible side of the “relationship management” between actors along the Supply Chain.

- **Outcomes:**

New paradigm, new instrument to better understand how to manage all the actors along the Supply Chain. A better focus on organizational dimension in addition to production/operational dimension.

Managing the supplier in a circular economy supply chain

- **Market & Business opportunities:**

Outcomes useful in particular for B2C organisations but not only. In general we want to work on a multi-industry project that can give us different perspective and the opportunity to encourage the contamination of ideas and practices.

- **Partners:**

Organisations that include sustainability in their mission
