

## Social license to operate: a tool to quantitatively assess the impacts of extraction activities on human well-being

### KAVA Activity: Upscaling (or Internationalization)

- **Goals:** Develop a tool to quantitatively assess the impacts from raw materials extraction on human well-being in order to facilitate the dialogue between mining companies, product companies, local communities and external stakeholders.
- **Expected synergies and complementarities:** complements ongoing upscaling KAVA activities, provides information on potential risks and solutions associated with supply of raw materials.
- **Outcomes:** A multipurpose online tool: i) quantification of the impacts of extraction activities on human well-being, ii) evaluation of options and measures to minimize impacts, ii) Facilitation of the dialogue along the value chain and with social parties
- **Partners already identified:**
- **Wanted additional partners:** Mining companies, electronics producers
