

Zirconium Recovery from European Ores / Residues

- Thematic Areas:
Hydrometallurgical recovery of Zr from Eudialyte leaching residues or other process residues
- Expected synergies and complementarities:
Residue treatment, generation of side products
- Outcomes:
Demo-Scale Process for Zr-Recovery
- Market & Business opportunities:
Zr in Europe, low cost Zr-production
- Partners already identified:
MEAB GmbH (GER), BGRM (FR), University of Lorrain (FR)
- Wanted additional partners:
Industry partners for technology implementation/adaption

Zirconium Recovery from European Ores / Residues

- TRL > 5
- 600 kg ore processed successfully
- 25 kg REE extracted & separated
