

Prospective & dynamic MFA

- **Thematic Areas/Technology/Topic of focus + key elements of the idea/problem:**
What will be the flow of major and some minor materials by 2050 in the EU? Need to sort out Primary and Secondary Raw Material routes and project the total market, probably with a world vision. Mixture of Foresight and MFA, based on sound knowledge on materials.
- **Expected synergies and complementarities:**
Intermaterial synergies, as separation has to be taken on board as well as co-recycling
- **Outcomes:**
A strategic vision of several materials' future, based on dynamic and prospective MFA
- **Market & Business opportunities:**
Food for thought for strategic think tanks, also for business and government strategists
- **Partners already identified:**
Materials producers
- **Wanted additional partners:**
Recyclers, foresight experts, MFA community
